

# Engineers' Conclave

Civil and Environmental Engineering are among the most premier and fast evolving branches of science and engineering. They provide a vast scope for research and a plethora of opportunities for the budding engineers to contribute to the society and make it better place to live by innovations in research.

The Association of Civil Engineers (ACE), IIT Patna, is proud to announce the 'Engineers' Conclave' in the second edition of Samnivesha'20. The conclave will act as a platform for aspiring engineers and researchers to present their research prospects which will be reviewed by intense interaction and questionnaire with leading researchers and professionals. It is a great opportunity for both undergraduate and post graduate students to present their research in a professional academic setting and interact one to one and get instant feedback from top notch professors in the field. So bring out the research enthusiast in you and showcase your ideas and research prowess and instincts in front of eminent professors and industrial experts!

Student research refers to any scholarly activity ranging from scientific experimentation, case study, review articles etc. The broad divisions and fields of the research presentation will include Structural Engineering, Transportation Engineering, Geotechnical Engineering, Water Resources Engineering and Environmental Engineering. Students can also present research on other branches of civil engineering not listed above.
